

I/A Series® Remote Terminal Unit (RTU) C50 V.23/Bell 202 Dual Communications Module

The C50 V.23 Dual Communications Module provides two independent V.23/Bell 202 communication channels (2 wire or 4 wire). These can be employed as two separate SCADA communication channels to two C50 Master Stations, or the second channel can be used as a backup.

FEATURES

- The C50 V.23 Dual Communications Module provides two independent V.23/Bell 202 communication channels (2 wire or 4 wire). These can be employed as two separate SCADA communication channels to two C50 Master Stations, or the second channel can be used as a backup.
- ### FEATURES
- Built-in modem supporting CCITT V.23/Bell 202
 - Data rates of 150 to 1200 baud
 - Two independent, user configurable channels
 - Built-in microprocessor to process signals and ease the load on the Master Processor Module
 - Imbedded modem
 - User configurable radio interface for both channels (push-to-talk relay)
 - Protocols supported:
 - Conitel C2025
 - Conitel C300
 - Conitel C3000
 - Baker
 - Harris
 - DNP 3.0
 - Removable plug connected terminator block, which allows the communications module to be removed without disconnecting the field wiring

Module Description

The C50 V.23/Bell 202 Communications Module (see Figure 1) provides 2 KVolt isolation on each of the two independent communications channels.

The module is controlled by an onboard microprocessor that is responsible for sending and receiving messages, error detection, and control of the communications protocol.

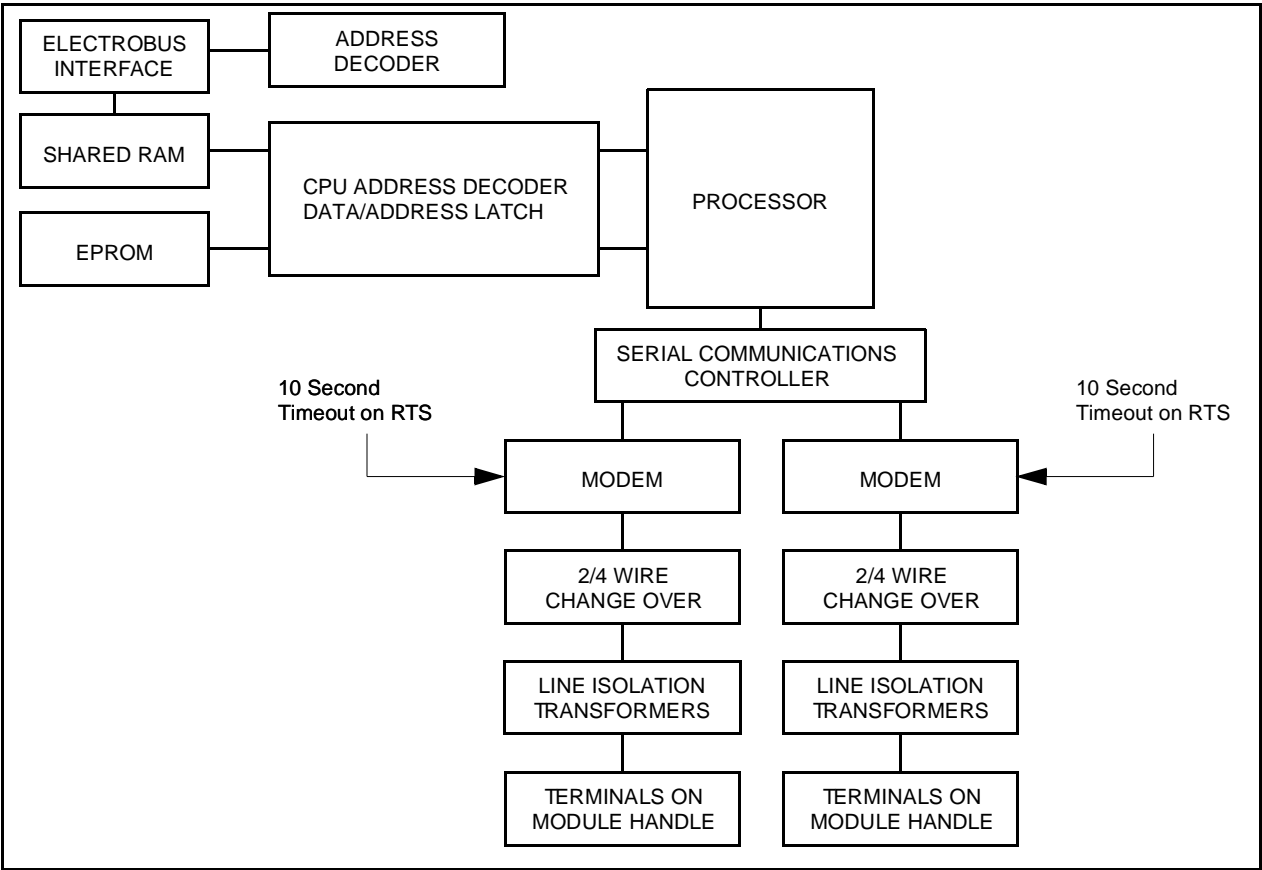

Figure 1. C50 V.23 DCB Module Functional Block Diagram

Communications Subsystem

The communications subsystem of the C50 RTU is based on intelligent communication modules with a high speed direct digital interface (see Figure 2).

The cards contain a microprocessor, with associated ROM and RAM. Communication with the Master Processor Module is made possible by shared memory located on the DCB. The onboard processor is responsible for sending and receiving messages, and for control over the communications protocol.

A serial communications controller and two modems are used to implement the two independent channels (see Figure 3). The setup of the communications controller is user configurable, and is performed when the RTU is configured.

Communication integrity is monitored by error detection algorithms appropriate to each supported communication protocol. Corrupted messages are rejected, guaranteeing a high level of data integrity.

PHYSICAL SPECIFICATIONS

Physical Size
160 mm x 125 mm

Modem
7911

Terminations
Phoenix MSTB plugged screw terminals

ENVIRONMENTAL SPECIFICATIONS

Ambient Temperature
0°C to 60°C (optional -20° to 60°C)

Humidity
10% to 95% RH (non-condensing)

FUNCTIONAL SPECIFICATIONS

Power Requirements

540 mAmps @ 5 V
33 mAmps @ -15 V

Processor Type

Z80 interfaced to Electrobus via shared RAM

Communications Controller

Z85C30

Number of Channels

Two

Operating Modes

Asynchronous

Data Rate

150 to 1200 baud

Mark Frequency

1300 Hz (V.23)
1200 Hz (Bell 202)

Static Frequency

2100 Hz (V.23)
2200 Hz (Bell 202)

Supported Protocols

Conitel C300, C3000, C2025; Baker; Harris; DNP 3.0

Line Termination

600 ohms (2 or 4 wire) or 500 Kohm high impedance

Isolation

3.5 KVolts rms Tx/Rx to chassis
2.0 KVolts rms Tx to Rx

Loop Back Modes

Analog, digital and software loopback

Interface Type

CCITT V.23/Bell 202 (half duplex)

Output Signal Level

-39 dBm to +0 dBm

Input Signal Range

-43 dBm to +0 dBm

Radio Interface

Push-to-talk relay form A contact 100 mA, 28 V
Phoenix MSTB plugged screw terminals
Extended pre-transmission mark time configured via software

Transient Protection

IEC 255-4 Class 3; ANSI/IEEE C37.90.1-1974
IEC 255-22-4; IEC 801-4

Continuous Transmit Protection

Time out on long RTS (10 seconds)

ORDERING INFORMATION	
Part Number	Description
0303319	V.23/Bell 202 Dual Communications Controller
1050074	Harris 5000/5500 Firmware
1050065	C3000 Conitel Firmware
1050021	C2025 Conitel Firmware
1050021	Baker Firmware

NOTE

Be sure that appropriate firmware is ordered and installed.
