

I/A Series[®] Software Message Generator (MSG) Block

Message Generator (MSG) block generates state change messages for Intelligent Field Devices and control schemes requiring simple message generation.

OVERVIEW

The MSG block can receive up to eight message requests from Intelligent Field Devices and generate a state change message for each state transition (0-to-1 or 1-to-0). For each message request input, the user can assign state change text or in the case of the Hydrostatic Tank Gauge, have the text imported from the ECB13 supporting HTG in the same station.

STANDARD FEATURES

- Eight state change message indicators
- One of eight alarm device group assignments
- Up to 16 state messages
- Auto mode
