

**Multiple Contact Output (MCOUT) Block**

The Multiple Contact Output (MCOUT) block is a multiple channel digital contact or Boolean logic output block for controlling contacts, alarms, status conditions, sequence steps, etc.

**OVERVIEW**

The MCOUT block provides Auto/Manual control of up to 16 Boolean-type inputs that are addressed to the specified Fieldbus Module output points. A block-level initialization parameter is available for cascading the block state to other driving blocks.

**STANDARD FEATURES**

- ▶ Manual/Auto control of all points
- ▶ Bad Fieldbus Module detection
- ▶ Initialization state parameter (block-level)

**OPTION**

- ▶ Bad alarming
